Follow the courageous journey of John Lewis, whose unwavering fight for justice spans the past 50 years, from his youth in the segregated South, through his leadership within the Civil Rights movement, to his current role as a powerful voice in Congress. He was the youngest speaker at the historic 1963 March on Washington, where Dr. King delivered his legendary "I Have a Dream" speech. And in March 1965, Lewis led the Bloody Sunday march in Selma, where Alabama State Troopers attacked peaceful protesters with billy clubs, bullwhips and tear gas. Their horrific actions were broadcast on nightly news reports into living rooms across America; eight months later, the Voting Rights Act was signed into law. Once an activist pushing from the outside, Lewis, now 76 years old, has become a determined legislator making noise on the inside. Considered by many to be the conscience of Congress, with equal measures of modesty and forcefulness, Lewis strives to persuade D.C. powerbrokers to hear the voices of the unheard. Despite setbacks-and there have been many-John Lewis' eyes remain on the prize.

Thomas Jefferson is by most accounts the most admired and greatest figure in American history. However, he was a man whose behavior in many ways contradicted his public declarations. He supported resistance and revolution in America and France, yet was not a charismatic politician or front-line soldier. His eloquence was immortalized in the Declaration of Independence, which declared that "All men are created equal." He disapproved of the slave trade, yet owned over 200 human beings and had no intention of granting them their freedom. A Renaissance man in his own right, Jefferson was an architect, writer, surveyor, statesman and scientist. In part 1 of Ken Burns' biographical portrait of Thomas Jefferson, Jefferson's beginnings in Virginia are detailed from his education at William & Mary, the building of Monticello, to his marriage and children. Jefferson is called to Philadelphia as a statesman, and to Paris after the American revolution as an official diplomat. While Jefferson was laying the foundations of a new government and country, his work was tragically interrupted by a series of personal losses at his Monticello home.

Two and a half millennia ago, a new religion was born in northern India, generated from the ideas of a single man, the Buddha, a mysterious Indian sage who famously gained enlightenment while he sat under a large, shapely fig tree. The Buddha never claimed to be God or his emissary on earth. He said only that he was a human being who, in a world of unavoidable pain and suffering, had found a kind of serenity that others could find too. This documentary by award-winning filmmaker David Grubin tells the story of his life, a journey especially relevant in our own bewildering times of violent change and spiritual confusion. Richard Gere narrates.

Follow the courageous journey of John Lewis, whose unwavering fight for justice spans the past 50 years, from his youth in the segregated South, through his leadership within the Civil Rights movement, to his current role as a powerful voice in Congress. He was the youngest speaker at the historic 1963 March on Washington, where Dr. King delivered his legendary "I Have a Dream" speech. And in March 1965, Lewis led the Bloody Sunday march in Selma, where Alabama State Troopers attacked peaceful protesters with billy clubs, bullwhips and tear gas. Their horrific actions were broadcast on nightly news reports into living rooms across America; eight months later, the Voting Rights Act was signed into law. Once an activist pushing from the outside, Lewis, now 76 years old, has become a determined legislator making noise on the inside. Considered by many to be the conscience of Congress, with equal measures of modesty and forcefulness, Lewis strives to persuade D.C. powerbrokers to hear the voices of the unheard. Despite setbacks-and there have been many-John Lewis' eyes remain on the prize.

Two and a half millennia ago, a new religion was born in northern India, generated from the ideas of a single man, the Buddha, a mysterious Indian sage who famously gained enlightenment while he sat under a large, shapely fig tree. The Buddha never claimed to be God or his emissary on earth. He said only that he was a human being who, in a world of unavoidable pain and suffering, had found a kind of serenity that others could find too. This documentary by award-winning filmmaker David Grubin tells the story of his life, a journey especially relevant in our own bewildering times of violent change and spiritual confusion. We've all heard of the Warsaw Ghetto Uprising, but most people have no idea how widespread and prevalent Jewish resistance to Nazi barbarism was. Instead, it's widely believed "Jews went to their deaths like sheep to the slaughter." Filmed in Poland, Lithuania, Latvia, Israel, and the U.S., Resistance - They Fought Back provides a much-needed corrective to this myth of Jewish passivity. There were uprisings in ghettos large and small, rebellions in death camps, and thousands of Jews fought Nazis in the forests. Everywhere in Eastern Europe, Jews waged campaigns of non-violent resistance against the Nazis.

Thomas Jefferson is by most accounts the most admired and greatest figure in American history. However, he was a man whose behavior in many ways contradicted his public declarations. He supported resistance and revolution in America and France, yet was not a charismatic politician or front-line soldier. His eloquence was immortalized in the Declaration of Independence, which declared that "All men are created equal." He disapproved of the slave trade, yet owned over 200 human beings and had no intention of granting them their freedom. A Renaissance man in his own right, Jefferson was an architect, writer, surveyor, statesman and scientist. In part 1 of Ken Burns' biographical portrait of Thomas Jefferson, Jefferson's beginnings in Virginia are detailed from his education at William & Mary, the building of Monticello, to his marriage and children. Jefferson is called to Philadelphia as a statesman, and to Paris after the American revolution as an official diplomat. While Jefferson was laying the foundations of a new government and country, his work was tragically interrupted by a series of personal losses at his Monticello home.

Follow the courageous journey of John Lewis, whose unwavering fight for justice spans the past 50 years, from his youth in the segregated South, through his leadership within the Civil Rights movement, to his current role as a powerful voice in Congress. He was the youngest speaker at the historic 1963 March on Washington, where Dr. King delivered his legendary "I Have a Dream" speech. And in March 1965, Lewis led the Bloody Sunday march in Selma, where Alabama State Troopers attacked peaceful protesters with billy clubs, bullwhips and tear gas. Their horrific actions were broadcast on nightly news reports into living rooms across America; eight months later, the Voting Rights Act was signed into law. Once an activist pushing from the outside, Lewis, now 76 years old, has become a determined legislator making noise on the inside. Considered by many to be the conscience of Congress, with equal measures of modesty and forcefulness, Lewis strives to persuade D.C. powerbrokers to hear the voices of the unheard. Despite setbacks-and there have been many-John Lewis' eyes remain on the prize.

Bob Dylan participates for the first time in an exclusive, full-length film biography. From his explosive arrival on the downtown New York City scene in 1961 - with a raspy voice, pounding guitar and stunning lyrics - through his near-fatal motorcycle accident in Woodstock in 1966, no one had more of an impact and no one changed the landscape of contemporary music more profoundly. Private, almost reclusive, disdainful of customary forms of publicity, Dylan has now agreed to make an appearance in his own story, illuminated in particular by this remarkable five-year period. Directed by Martin Scorsese, this intimate and incomparable film includes an archive of never-before-seen footage from childhood, from the road and from backstage, as well as unreleased interviews conducted over the past 15 years with other seminal figures from those times - some of whom, like Allan Ginsberg, are long dead. And, Dylan brings the rights to his legendary music with him - "Blowin' in the Wind," "Like a Rolling Stone," "Don't Think Twice," "Mr. Tambourine Man," "It Ain't Me Babe," "Just Like a Woman," "Positively 4th Street," "The Times They Are A-Changin'" - and on and on.

In the decade leading up to 1945, it's estimated that the Nazis stole one-fifth of all artwork in Europe - the majority from Jewish families and other "undesirables" - in a culture war that was designed to rewrite European history. But that was just the beginning. Secret networks of curators and dealers - many of them Nazis like Bruno Lohse (the Plunderer) - made fortunes on the back of Nazi-looted art, perpetuating a decades-long war crime that has never been fully exposed or resolved. Through interviews with gallery owners, curators, art investigators, Lohse's close friends, and the descendants of the victims of Nazi art theft, along with a tour through breathtaking masterpieces and an extensive archive of personal letters, the dark underbelly of the international art world is revealed.

Follow the courageous journey of John Lewis, whose unwavering fight for justice spans the past 50 years, from his youth in the segregated South, through his leadership within the Civil Rights movement, to his current role as a powerful voice in Congress. He was the youngest speaker at the historic 1963 March on Washington, where Dr. King delivered his legendary "I Have a Dream" speech. And in March 1965, Lewis led the Bloody Sunday march in Selma, where Alabama State Troopers attacked peaceful protesters with billy clubs, bullwhips and tear gas. Their horrific actions were broadcast on nightly news reports into living rooms across America; eight months later, the Voting Rights Act was signed into law. Once an activist pushing from the outside, Lewis, now 76 years old, has become a determined legislator making noise on the inside. Considered by many to be the conscience of Congress, with equal measures of modesty and forcefulness, Lewis strives to persuade D.C. powerbrokers to hear the voices of the unheard. Despite setbacks-and there have been many-John Lewis' eyes remain on the prize.

As one of America's founding fathers, Thomas Jefferson is considered by some to be the man of the millennium, analogous to the progress of the first 200 years of American history. He was a man of freedom and expansion, yet he had the restraint that is necessary to succeed with that freedom--the commitment to becoming learned and skilled. As the third president of the United States, Jefferson was responsible for doubling the size of the country with the Louisiana Purchase and for assigning Meriwether Lewis and William Clark to their historic expedition of the West--moves that were symbolic of Jefferson's yearning for personal growth. In this episode, Jefferson's battles with the Federalist movement are explored; as well as his controversial relationship with his slave, Sally Hemings; his retirement to Monticello; and the ensuing personal tragedies that surrounded him towards the end of his life.

In the decade leading up to 1945, it's estimated that the Nazis stole one-fifth of all artwork in Europe - the majority from Jewish families and other "undesirables" - in a culture war that was designed to rewrite European history. But that was just the beginning. Secret networks of curators and dealers - many of them Nazis like Bruno Lohse (the Plunderer) - made fortunes on the back of Nazi-looted art, perpetuating a decades-long war crime that has never been fully exposed or resolved. Through interviews with gallery owners, curators, art investigators, Lohse's close friends, and the descendants of the victims of Nazi art theft, along with a tour through breathtaking masterpieces and an extensive archive of personal letters, the dark underbelly of the international art world is revealed.

Julia Alvarez: A Life Reimagined is a documentary film about the life and work of Julia Alvarez, one of America's most celebrated Latina writers. Alvarez burst onto the literary scene in 1991 with her semi-autobiographical novel, *How the Garcia Sisters Lost Their Accents*, to great acclaim, followed by *In the Time of the Butterflies* (1994), which raised global awareness about three sisters assassinated by Dominican dictator Rafael Trujillo, and was made into a major motion picture. Her most recent novel, *Afterlife*, explores the universal issues of aging, loss and healing, and joins the debate about Latino immigrants in the United States. Called "a writer of gigantic storytelling talent, and exquisitely composed prose," Alvarez has helped blaze the trail for generations of Latina/o authors helping transform American culture and literature. Now 72 years old, she feels that time is running out to tell all of the stories still within her. The film will explore her childhood in the Dominican Republic, her complex family dynamics, the lifelong impact of their escape from the dictatorship, her feelings of displacement, hybridity and loss - and how she transforms all of this, in a nuanced, complex writing voice - into poetry, essays and novels.

From Jesus' triumphant entry into Jerusalem, through to his eventual crucifixion six days later, the key moments have been immortalized in countless films, pieces of music, and works of art. But in recent years, some historians have begun to question inconsistencies in the Gospels' version of events. They believe that the Gospels could hide a very different story; one that casts the historical Jesus in an entirely new light. Based on a new interpretation of contemporary historical events in Rome, "Last Days of Jesus" peels back thousands of years of tradition, to explore a new political context to the events in Jerusalem. "Last Days of Jesus" explores how dramatic political events in Rome could have played a crucial role in shaping Jesus' destiny, and examines an extraordinary political alliance that altered the course of history.

For almost two thousand years, the story of Jesus' final days has been celebrated by Christians the world over. From Jesus' triumphant entry into Jerusalem, through to his eventual crucifixion six days later, the key moments have been immortalized in countless films, pieces of music, and works of art. But in recent years, some historians have begun to question inconsistencies in the Gospels' version of events. They believe that the Gospels could hide a very different story; one that casts the historical Jesus in an entirely new light. Based on a new interpretation of contemporary historical events in Rome, "Last Days of Jesus" peels back thousands of years of tradition, to explore a new political context to the events in Jerusalem. "Last Days of Jesus" explores how dramatic political events in Rome could have played a crucial role in shaping Jesus' destiny, and examines an extraordinary political alliance that altered the course of history.
